- 1 Suction fluid container: 1 litre (automatic overflow protection)
- 1 DENTA-BAG carrying bag

Technical Data

- Weight: 3.9 kg (weight including DENTA-BAG 4.5 kg)
- Dimensions MINIMAX-VAC: 190mm × 140mm × 285mm
- Dimensions DENTA-BAG carrying bag: 300mm × 275mm × 275mm

Warranty: 2 years

Options: DENTA-PRO, DENTA-TROLLEY, DENTA-CASE etc.

Minimax-Vac

High-tech in miniature

The MINIMAX-VAC sets new standards in portable plug-and-play suction units.

To start the MINIMAX-VAC it only needs to be plugged into mains power. With a weight of only 3.9 kilograms (!), the MINIMAX-VAC, with over 300l/min (!), achieves a comparable suction to a permanently installed treatment unit in a dental office. The suction can be seamlessly regulated any time. Due to this pioneering key data MINIMAX-VAC can be used in many areas such as mobile dentistry, in the dental office, or in numerous other areas of medicine.

-  Continuous Operation
-  Full Performance
-  Plug-and-Play
-  Portable/Light

Self-contained high-performance
