

THE MODERN THERAPIST

A comprehensive Therapist workshop

Cat Edney is a multi award winning Dental Therapist with a passion for bringing the Dental Therapy role back into practice. Cat lectures for a number of organisations on the implementation of protocols that not only drive the dental therapy profession but also supports Dental Therapists who wish to get back to using their full skill sets. Cats passion for showcasing Dental Therapy extends to helping therapists with their in surgery workflows and equipment selection in order to ensure long lasting, outstanding outcomes for their patients.

LEARNING OUTCOMES

Aims

This Interactive day is designed to support Therapists with the successful implementation of the therapists role in practice, with a comprehensive hands on element designed to improve confidence and develop Therapist skills with caries management, cavity design and composite placement.

Objectives

- Discuss the therapy role and scope in the UK
- Discover steps for successful implementation protocols
- Portfolio building
- Introduction to digital dentistry, photography and scanning
- Rubber Dam Clamp and Equipment selection

- Caries management
- Cavity design
- Matrix selection and troubleshooting
- Posterior Composite placement workshop

Development outcomes

The courses meets the criteria for the GDC's development outcomes A B C

LEARNING CONTENT

This day will provide the learner with skills to successfully implement the role of the dental therapist in practice. The skills learnt will empower Therapists to use their full skillset and produce replicable and predictable outcomes for their patients.
